Art Unit: 1651

Claims 1, 3, and 6-9 are presented for examination on the merits.

Further, the Preliminary Amendment filed August 27, 2001, has been received and entered.

Note that the IDS filed October 15, 2001, has been received but since the 371 national stage document was not available to the examiner the references have not been considered. Examiner will continue to the effort to receive this file, however, to expedite matters the examiner respectfully requests the resubmission of the document copies.

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1, 3 and 6-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are rendered vague and indefinite for the recitation of the phraseology "or functional fragment thereof" wherein the meaning of this phrase does not well define the claimed subject matter. Deletion of this phrase is requested in all occurrences of it in the claims.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application

Application/Control Number: 09/889,256

Art Unit: 1651

by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

- DKW  
9/02
4. Claims 1, 3 and 6-9 are rejected under 35 U.S.C. 102(a) as being anticipated by Wagner et al (A) or DePinho (B).

The claims are drawn to composition comprising a functional fragment.

Both of references A and B teach a functional fragment or ingredient of a composition.

See both of the abstracts.

The claims are identical to the cited disclosures and are therefore, considered to be anticipated by the teachings of the cited references.

All claims fail to be patentably distinguishable over the state of the art discussed above and cited on the enclosed PTO-892 and/or PTO-1449. Therefore, the claims are properly rejected.

The remaining references listed on the enclosed PTO-892 and/or PTO-1449 are cited to further show the state of the art.

No claims are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Deborah K. Ware whose telephone number is (703) 308-4245. The examiner can normally be reached on Mondays to Fridays from 9:30AM to 6:00PM.
